

# ZipChip

YOUR MASS SPEC'S SIDEKICK

Our team has compiled this list of concise protocols and technical notes to help you facilitate high-quality science. Simply log in to our customer support portal to view these files and more.

## Protocols

- Amino Acid Mixture Analysis
- Quantification of Amino Acids in Growth Media
- Quantification of Amino Acids in Plasma
- Peptide Mixture Analysis
- SPE Clean-Up of Protein Digests for Peptide Mapping Experiments
- mAb Reduction and Analysis
- Subunit Analysis of mAbs
- Intact mAb Analysis Using Denaturing Conditions
- NIST mAb Intact Analysis
- NIST mAb Native Analysis
- Supercharging Reagents for Intact Antibody Charge Variant Analysis
- Boosting Sensitivity for Intact Antibody Charge Variant Analysis

## Tech Notes

- ZipChip: What They Are & How They Work
- ZipChip Performance Validation Study
- Using Field Strength Gradients to Enhance ZipChip Analysis
- Using the ZipChip Infusion Function
