

CQAs in 7 minutes

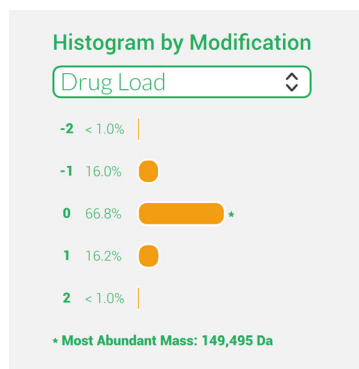

And yes – that includes analysis!

We make this possible with fast separations and near-instant twiddle-free data analysis. Darwin uses the rich information from both the ZipChip capillary electrophoresis and mass spec domains so you can skip the finicky manual steps typically needed for biotherapeutic analysis.

- » Sequence confirmation
- » Deamidation
- » Purity and charge heterogeneity
- » Glycoforms

Darwin™ is all about the biology. Built in PTMs, and custom options such as drugs or linkers can be reviewed for relative abundances and compared seamlessly within or across data sets. What's more, Darwin delivers all of this in one speedy analysis.

Charge heterogeneity? No problem. Variants are seamlessly identified and quantified. And if ADCs are your thing, you came to the right place. Darwin delivers your DAR distributions in a flash.

Darwin is available to select Beta partners free of charge.
